No contract	No contract	Month to month avail.
Low International rates	Low International rates	International rates available
Last Years Phone Model	Newest Phones	

Note: There is a minimum of 3 phones per system

FAQs

Call Us: 888.530.9112

Can I test the phone system ahead of time? Of course! We will send you one phone to setup that will have a number to dial out on. It also will show your name and number to callers. Use it for one week and then make it part of your install or return it.

Can I install the system myself? Definitely. We provide drawings and YouTube videos of the 5 step process. We are always here to help walk you through it. If you prefer, for an additional fee, we can dispatch a tech to your location and do the install.

Will I have any surprises during the install? Since we have been in business over twelve years installing phone systems of many kinds, we know some gotchas that can happen. No two companies or installations are exactly alike. Maybe cords are too short coming from your network jack, maybe there are not enough electrical outlets under the desk. We hear you. For this reason we provide an accessory kit with every order in the event of short cords or no outlets. Use what you need and send the rest back,.

Can we cancel the service if we are unhappy with the quality of the calls?

Since there is no contract, you can cancel your monthly service at any time. But we don't think that will happen. Our techs will test your network before signing up - to see if it can handle voice calls without dropouts or degradation. We take pride in our skills in providing the best user experience, with a phone system from INTERKOM
